Product Designer (UI/UX & Frontend Development)

OBJECTIVE

Product Designer and UI-UX Designer with experience designing and shipping fintech, web, and mobile products. Strong background in user-centered design, usability, and product thinking, with the added advantage of hands-on development using WordPress, React, and React Native. Adept at turning complex requirements into intuitive, scalable, and visually clean digital experiences that solve real user and business problems.

WORK EXPERIENCE

Raba (Fintech Company) – Lagos, Nigeria

2025

Product Designer / Web & Mobile Dev

- Designed end-to-end user experiences for fintech products with a strong focus on usability, clarity, accessibility, and user trust.
- Created detailed user flows, wireframes, and high-fidelity UI designs for core fintech features including onboarding, dashboards, payments, and transaction history.
- Implemented and developed responsive web and mobile applications using React, translating designs into functional, scalable interfaces.
- Collaborated closely with developers, product managers, and stakeholders to ensure design feasibility and smooth implementation across web and mobile platforms.
- Simplified complex financial workflows into intuitive user journeys, improving overall product usability and user engagement.
- Built and maintained reusable UI components and design systems to ensure visual and functional consistency across products.
- Actively contributed to code reviews, bug fixes, and feature enhancements during development cycles.
